

Bioheat Tax Credit Program

The program provides an incentive for the use of bioheating oil, a 5% biodiesel blend of home heating fuel.

The tax credit is \$0.03 per gallon of bioheating oil purchased, with a maximum credit of \$500.00 per applicant per year.

Solar Energy Grant Program

This program provides funding for a portion of the costs to install solar energy systems.

Grants are \$2,500 per kilowatt, up to \$10,000 for photovoltaic systems and up to \$3,000 for solar water heating systems.

Interested parties are encouraged to visit our website for updates and applications.

For More Information:
www.Energy.Maryland.Gov

Geothermal Heat Pump Grant Program

Geothermal heat pumps reduce the energy needed to heat and cool a building.

MEA accepts applications throughout the year for systems installed in Maryland.
Grants are \$1,000 per ton, up to \$3,000.

Interested parties are encouraged to visit our website for updates and applications.

Wind Anemometer Loan Program

The program loans wind measuring devices to landowners; allowing them to analyze the wind resource available at their property and determine if a wind system is right for them.

WindSwept Grant Program

A limited number of grants are available to Marylanders to install wind energy systems of at least 1 kilowatt for residential properties and 1.5 kilowatts for non-residential properties. Grant amounts are \$2500 per kilowatt for a maximum grant amount of \$10,000
